

# DUCTING

## COLOUR CODE LABEL GUIDE

### General Information

To avoid confusion in our range of flexible duct sizes and types, we have colour coded labels for each size. The different colours denote the various sizes.

### This includes:

Type of duct core, insulation type, length of duct and type of sleeve (where applicable).

Eg. 'V-Flex RO.6 6m' = V-Flex with thermal resistance of RO.6 and is 6m long.
