Underfloor heating | Tiled shower solutions

# Undertile heating

Ceramic, porcelain, terracotta, stone, slate, marble or wood – undertile heating makes your tiled floor feel as great as it looks! In fact, it enhances the appearance of the whole room, because there is no ugly hardware in sight. If it wasn't for the lovely warm feeling in the room, you would never know it had been fitted.

The small diameter heating elements are available in a number of different lengths and wattages, with a solution for virtually every floor. They are laid between the tiles and substrate, so they are out of sight. More importantly, in wet areas such as bathrooms, they are safely out of reach. No matter what the season, you can walk barefoot on the tiles in complete comfort.

With undertile heating, your floor warms the entire room, gently, safely and efficiently. Radiant heat is recommended by health professionals, especially for asthma sufferers.

Manufactured at Warmup's own production facility, Warmup undertile heaters are a result of more than two decades of advanced research and development. Warmup brings you a new dimension in affordable, luxurious, effective heating which is simple to operate and maintenance-free.

Simply set your thermostat to the desired comfort level and feel the luxurious warmth...

## Product Range / Sizing Guide

MODEL	COVERAGE AREA	WATTS
UT200	0.5m <sup>2</sup> – 1.0m <sup>2</sup>	200
